## Summary

---

I am focusing on becoming a Full-Stack Developer, with hands-on experience in both frontend and backend development. Actively improving skills in React, Node.js, Django, MongoDB, while also building knowledge in DevOps tools.

## Education

---

Software Engineering(English), İstanbul Aydin University, 4th Year, Current GPA: 3.55/4.00, 2021 - Present

## Experiences

---

### Jr Software Developer , IHope Global Limited, İstanbul/Turkey, 05.2025-08.2025

- I developed PHP-based **e-commerce** projects in a real work environment. I customized **OpenCart** modules, used the **Journal theme**, and built solutions based on client needs.

### Intern Software Developer , IAU Corporate Communications Directorate, İstanbul/Turkey, 02.2025-05.2025

- I used **PHP** for the first time during my web development internship. I also used my previous knowledge while building a project with **DataTables** and **Mailtrap**, and learned about **database management** and **API integration**.

### Software Developer intern, Technoone, Denizli/Turkey, 06.2024-08.2024

- I worked on web development projects at Technoone and gained hands-on experience with **Node.js** and **MongoDB**.

### Software Developer intern, Proxolab, Denizli/Turkey, 06.2023-08.2023

- I worked on web development projects at Proxolab with other interns. I built applications using **HTML**, **CSS**, **JavaScript**, **Python**, **Django**, and **MySQL**, and gained strong teamwork experience.

## Community

---

### GDG Core Team Member, İstanbul Aydin University, İstanbul/Turkey, 09.2024-06.2025

- We organized several events as part of the core team. I joined a student team to build a mobile app using **Flutter**, **Firebase**, and **Gemini API**, and I was mainly responsible for the **database** and **backend**.

## Skill

---

### Language

- Turkish - Native
- English - Intermediate(B2)

### Programming (Extra-Experiential Learning)

- Reactjs
- Tailwindcss
- Postman

## Certificate

---

### Akbank Deep Learning Bootcamp Certificate

09.2025

### Akbank Generative AI Bootcamp Certificate

10.2025

## Project

---

### AI SaaS Full-Stack Platform

**Technologies:** React, Node.js, PostgreSQL, Clerk, Gemini API

- Built a full-stack AI SaaS platform with 5+ AI features such as article generation and background removal.
- Designed a scalable **PostgreSQL** backend and integrated secure user authentication using **Clerk**.
